- **Data Structures & Algorithms:** HashSet, ArrayList, LinkedList, Stack<T>
- Object-Oriented Programming, event-driven programming, and UI logic
- **Database & Backend:** PHP, SQL, ADO.NET, Session Handling

EXPERIENCE

Customer Service Representative |Work - Alorica - Hamilton, ON July 2022 - Sept 2022

- Cross-trained and provided backup support for organizational leadership.
- Handled over 25 inbound customer inquiries per day.
- Created and maintained a detailed database to develop promotional sales.
- Followed through on all critical inter-departmental escalations to increase customer retention rates.
- Answered customer telephone calls promptly to avoid on-hold wait times.
- Actively listened to customers, handled concerns quickly, and escalated major issues to a supervisor.

Line Cook |Work – Urban Fork – Hamilton, ON Sept 2024 – Dec 2024

- Fostered strong customer relationships, leading to a noticeable increase in repeat business and customer loyalty.
- Prepared and cooked food in a fast-paced environment, ensuring cleanliness and efficiency.
- Collaborated with team members to deliver quality service during peak hours

Battleship Bot AI (Java)|School Project – Algorithm Optimization & Strategy

- Developed an advanced AI bot that efficiently played 10,000 rounds of a 15x15 Battleship game.
- Designed and implemented a hybrid strategy using checkerboard search to identify likely ship locations and targeted hunting to sink them faster after hits.
- Utilized ArrayLists, custom data structures, and efficient looping logic to reduce runtime.
- Achieved peak performance by completing all games in under 5 seconds, earning full marks for time efficiency.
- Demonstrated strong skills in algorithm design, debugging, and performance tuning in Java.

Smart Locker System (Azure Cloud Architecture)|School Project – Capstone Design

- Designed a cloud-based sensor monitoring system for a secure storage locker service using Microsoft Azure.
- Proposed an architecture with services such as Azure IoT Hub, Blob Storage, Functions, and SQL Database to enable real-time data collection, low-latency access, and ISO 27018 compliance.
- Created mobile-first UI mockups, user flows, and technical documentation to support development.
- Integrated concepts of cloud governance, secure transfers, and high availability in line with enterprise standards.
- Delivered a final presentation showcasing the full-stack architecture and service recommendations**.**

Education

- **Advanced Diploma in Software Development**

  Mohawk College of Applied Arts and Technology – Hamilton, ON

  Expected Graduation: Dec 2026
